

Citizenship & RE Learning Journey

We aim to incorporate all three subjects of PSE, RE and Citizenship within Citizenship. We promote all three as academic subjects, and worth more than just the life skills they give students. We develop discussion skills as central to the subject to develop students oracy and their public speaking confidence. We also stimulate the key British value of tolerance through understanding of different views and we often have statements for assessments with students required to show understanding of two differing views before a conclusion is made. We promote understanding of sources with links to History and discuss manipulation and ways in which sources can be biased.
