

Geography Learning Journey

In Geography we seek to promote a love of the natural and physical world and how it shapes who we are as humans and as a planet. We aim to engage our students through small chunked topics, giving them the confidence that they have mastered a topic, and finding the links between topics. A focus on vocabulary with, for example, regular key word quizzing is a key aim of ours to be a feature within our lessons in order to promote retrieval practice and retention of important knowledge.

- Can present facts based on evidence presented
- Can form opinions from different views
- Can change opinion/show evidence to differing views
- Can interpret and analyse sources
- Can form substantiated judgements
- Can evaluate and make suggestions for improvements to issues
- Know key facts and apply them
- Can give alternatives to solutions presented to them
