

# Psychology Learning Journey

In Psychology we seek to promote a love and understanding of the human mind and how it shapes who we are as humans and as a society. We aim to engage our students through small chunked topics, giving them the confidence that they have mastered a topic, and finding the links between topics. A focus on vocabulary with, for example, regular key word quizzing is a key aim of ours to be a feature within our lessons in order to promote retrieval practice and retention of important knowledge.

## Subjects that could prepare you for **Psychology**

### English, Geography & History

Analytical skills, presenting arguments, debating, critical thinking,

### Maths

Collecting data, analysis of data, applying data, plotting graphs, formulas
